

Test with ASR Inserted

We evaluated the preliminary system on Pilot Database we collected through isip community. The test performance is summarized below in Table 1. This table gives the input to the system and response of the system.

The result is slightly different from Zheng's overall test performance. Two reasons contribute to the difference: one is we fixed some bugs, other is I concentrated on the evaluation of the system from the Database server point of view.

Table 1: Test Results of for Pilot Database

Summary	-	Pending: 103/274 Passed: 156/274 Failed: 15/274	-	-	Total "1" 152/274 (Error) Total "0" 122/274 (Correct)

Notes:

- "Pending" means the datasource is not available right now, total number is 103/274.
- "Passed" means it gets response from the system, total number is 156/274.
- "Failed" means it can not get the response from the system, total number is 15/274
- Error code "1" means error number should be increase by 1, total number 152/274.
- Error code "0" means correct response, total number is 122/274 here.
- The red "Passed" classification can be fixed by fixing bugs

All the passed utterances but not correct ($156-122 = 34$) are caused by bugs by Parser or DM or DB Server, they should be fixed gradually.
